EDUCATION

DUAL BACHELOR'S DEGREES: COMPUTER SCIENCE AND MATHEMATICS

August 2022 - May 2026

University of Maryland

College Park, MD

KAUST Gifted Student Program (KGSP) Scholarship

- Relevant Coursework: Machine Learning, AI, Data Science, Algorithms, Statistics, Linear Algebra

EXPERIENCE

Three-Paper Research Lead, AI & Data Systems in Higher Education

King Fahd University of Petroleum & Minerals

July 2024 - July 2026

- Led 10 researchers on a three-paper project analyzing 1,200+ academic files and survey responses.
- Built Python pipelines for ingestion, cleaning, transformation, and API integration across 600+ text files.
- Built a 150-sample Arabic-English benchmark across four detectors to test accuracy, bias, and robustness.
- Applied multilingual NLP to Arabic and English for feature extraction, classification, and analysis.

AI Math & Programming Model Trainer

Scale AI

January 2025 - April 2025

- Evaluated LLM math and code outputs for correctness, rigor, edge cases, and solution clarity.
- Authored 240+ structured critiques and corrected solutions, strengthening math and code-generation models.

Algorithmic & Computational Number Theory Research

UMD Smith URE; Williams College Polymath Jr; Mawhiba

October 2020 - August 2023

- Developed and benchmarked prime-counting algorithms for runtime and scalability.
- Analyzed prime last-digit distributions through computational experiments and statistical testing.
- Completed 800+ hours of earlier research and authored two papers, earning the ExxonMobil Research Prize.

PROJECTS

Financial News Transformer & Return-Direction Classification | *PyTorch, NLP, Transformers* | [GitHub](#)

- Implemented an encoder-only PyTorch Transformer with MLM pretraining and classification workflows.
- Engineered zero-lookahead ETL aligning 500K+ timestamped articles with next-session stock returns.

Saudi Real Estate Pricing & Valuation Intelligence | *SQL, XGBoost, scikit-learn* | [GitHub](#)

- Built a leakage-safe pricing pipeline for 103K Saudi land listings with chronological splits.
- XGBoost cut MAE 42.8% vs. tuned KNN; $R^2 = 0.63$ on 19.6K held-out listings.

Adaptive LLM Routing & Agentic Workflow Engine | *FastAPI, Redis, Docker* | [GitHub](#)

- Built a FastAPI LinUCB router, cutting LLM API costs 40% while retaining 93% of baseline quality.
- Engineered self-reflection and verification, reducing factual-error rates 30% versus direct generation.

HONORS & PROGRAMS

- Scholarships:** KAUST Gifted Student Program (KGSP); Aramco College Degree Program (CDPNE).
- Awards:** ExxonMobil Research Prize; Two Math Kangaroo Medals.
- Programs:** NC State Foundation Year; ASU Entrepreneurship & Leadership Program.

EXTRACURRICULARS

Math Kangaroo Channel, YouTube

- Produced 300+ step-by-step math videos, turning advanced problems into 20+ hours of clear instruction.

Founder, Tutoring Organization

- Led five tutors serving 200 students over two years, helping achieve a top regional ranking.

SKILLS

Programming Languages: Python, SQL (PostgreSQL), C, Java, Pandas, NumPy

ML & Analytics: PyTorch, scikit-learn, XGBoost, Transformers, NLP, Statistical Modeling

Data & Deployment: FastAPI, Docker, MLflow, Tableau, Git

Languages: Arabic (Native), English (Advanced).
